INTRODUCING OUR SALON LEVEL SYSTEM

Introducing our Salon Level System! All of our salon staff will be working on a Performance-Based Level System beginning on **June 1st!** As a stylist moves up the levels and achieves performance based promotions their prices increase slightly, which means that different stylists will have different prices for similar services.

The level system accomplishes two main goals. **The first is to provide a career path of growth and achievement** for our team. The second is to provide **several options for our clients' various needs**. Guests may choose the level that best fits their needs and their budget.

Beginning on June 1st, our menus will include price ranges for hair services.

The designers level of competency or creativity is not necessarily related to the years of experience he or she has. This is a common misconception. The training our team receives is aggressive, consistent, innovative, and in-depth. It starts from the moment they are hired and continues through their entire career with us. At Serenity Spa and Salon **our salon staff achieves promotions based on several factors, including guest satisfaction, guest retention, performance, and continuing education.**

We would also like to extend a special congratulations to our stylists **Tim and Candice**, who have been promoted to **Level 3 Stylists!**
