# INTRODUCING OUR SALON LEVEL SYSTEM

Introducing our Salon Level System! All of our salon staff will be working on a Performance-Based Level System! As a stylist moves up the levels and achieves performance based promotions their prices increase slightly, which means that different stylists will have different prices for similar services.

The level system accomplishes two main goals. **The first is to provide a career path of growth and achievement** for our team. The second is to provide **several options for our clients' various needs**. Guests may choose the level that best fits their needs and their budget.

Our menus will now include price ranges for hair services.

The designers level of competency or creativity is not necessarily related to the years of experience he or she has. This is a common misconception. The training our team receives is aggressive, consistent, innovative, and in-depth. It starts from the moment they are hired and continues through their entire career with us. At Serenity Spa and Salon **our salon staff achieves promotions based on several factors, including guest satisfaction, guest retention, performance, and continuing education.**

We would also like to extend a special congratulations to our stylists **Tim and Candice**, who have been promoted to **Level 3 Stylists!**

# NEW PRODUCT!

## Introducing Marini CelluliTx!

**New product alert!** Jan Marini has done it again with another amazing product!

Cellulite occurs as our connective fibers lose elasticity and create anchors to underlying tissue. Encapsulated pockets of fat then push up on the surface of the skin, causing a dimpled appearance.

Cellulite can have a significant effect on a person's quality of life - impacting confidence, activity choices, clothing, and more. There are limited options to treat cellulite, many of which can be painful and cost thousands. Now, there is an alternative solution with **Marini CelluliTx** cream!

# LASER HAIR REMOVAL

## Laser Hair Removal

Laser hair removal permanently eliminates unwanted hair from your body and can include removing hair from the face, arms, underarms, bikini area and chest, legs and back. Laser hair removal is now available for most skin types.

Schedule a free consultation to determine if you are a good candidate for the procedure.

**50% off  
all treatments  
this month!**

## How Does Laser Hair Removal Work?

Highly concentrated light energy from the laser is used to target and destroy hair follicles responsible for hair growth without harming surrounding tissue. The pigment in these follicles absorbs the light which destroys the hair. This results in permanent hair reduction that's fast, easy and FDA-cleared.

Typically 8-10 treatments are required to achieve desired results. Several factors, including skin type, area of body being treated and hair color will establish the treatment plan outlined by our certified technicians.

During treatment, most people feel only a slight pinch at the treated area. Immediately following the treatment most people experience a mild, sunburn-like sensation, possibly accompanied by some minor swelling, which can last two to 24 hours.
